

OVERVIEW

The IPMC cost-effective online e-learning program, was successfully developed and delivered as a courseware and learning management solutions for the IT student.

The IPMC's e-learning program is an online portal providing a comprehensive library of IT and business-related off-the-shelf eLearning courseware to both corporate users and individuals alike. With IPMC's e-learning solutions, new learners have immediate access to an established learning community.

We give learners the benefit of choosing from an array of courses, and also the method in which they want to learn them: through self-paced learning, instructor-led classes or a blend of both. Because we host the training site, our courses are automatically updated on a regular basis – keeping the learner abreast with the latest.

PORTAL

eLearning is an online portal that has a unique product line – a comprehensive repository of high quality, state-of-the-art IT courses. It is a web-based eLearning platform that gives the learners the flexibility to access courses anytime, anywhere. The portal is thus completely dedicated to delivering high quality eLearning content that is capable of delivering increased annuities over the complete customer lifecycle.

The portal commands expertise in the following areas:

 Exceptional quality of graphical interface design, visualization, programming, and management

 Subject matter expertise available from a pool of over 200 in-house Trainers in varied technology areas.

 Clearly defined standards and procedures for all phases of CBT & WBT development in Ghana
